Executive Profile

ReliantEdge Solution Services is an ERP and Business Solutions consulting firm built for organizations that want stronger control, real-time visibility, cleaner processes, and scalable growth. We combine accounting discipline, operational process knowledge, implementation governance, and practical technology delivery to turn fragmented business activity into integrated, intelligent operations.

Our promise is simple: we help leadership stop chasing the business and start running it through reliable systems, clean data, measurable controls, and dashboards that reveal what is happening now - not weeks later.

What We Deliver

ERP Implementation	End-to-end deployment from discovery and blueprint to migration, training, go-live, and stabilization.
Financial Systems & Reporting	General ledger design, multi-company structures, management accounts, dashboards, and audit-ready reporting.
Business Process Re-engineering	Process redesign to eliminate duplication, manual approvals, spreadsheet dependency, and weak control points.
HRMS & Payroll	Payroll structures, payslips, statutory schedules, approval workflows, and workforce reporting.
System Integration	Interfaces with banking, PMS/POS, payroll, e-invoicing, Power BI, and other business-critical tools.
Support & Optimization	SLA-based support, health checks, reporting improvements, user coaching, and continuous process optimization.

Focused ERP Platforms

Sage 300cloud	Financial management, distribution, inventory, project costing, procurement, order processing, multi-currency and multi-company reporting.
Microsoft Dynamics 365	Business Central, CRM, Power BI, Microsoft 365 collaboration, Power Platform, and Azure-connected business operations.
ERPNext	Finance, inventory, sales, purchases, HR, payroll, manufacturing, projects, support desk, workflows, print formats, and custom dashboards.

ERP Implementation Methodology

1. Discovery & Business Case

Interview stakeholders, map pain points, assess readiness, define success measures, and identify project risks.

2. Blueprint & Controls Design

Design chart of accounts, workflows, approvals, reports, integrations, roles, and statutory requirements.

3. Configuration & Customization

Configure modules, document business rules, build print formats, create dashboards, and align the system to agreed processes.

4. Data Migration & Validation

Clean master data, migrate opening balances, validate inventory, reconcile ledgers, and secure user sign-off.

5. Training & UAT

Run role-based training, execute UAT scripts, track issues, correct gaps, and prepare the business for go-live.

6. Go-Live, Stabilization & Optimization

Support cutover, resolve issues, monitor adoption, refine reports, and transition to SLA-based support.

Industries We Serve

Hospitality - Finance, procurement, inventory, payroll, fixed assets, PMS/POS integrations, departmental P&L, and daily revenue controls.

Trading & Distribution - Sales orders, purchasing, warehouses, stock ageing, branch performance, margin control, and bank/payment integrations.

Professional Services - Projects, billing, CRM, timesheets, project profitability, WIP visibility, and executive dashboards.

Manufacturing - BOM, MRP, production, quality, costing, stock control, purchasing, and production variance reporting.

SMEs & Enterprises - Core accounting, sales, purchases, inventory, payroll, statutory reports, dashboards, and scalable controls.

Nigerian Compliance Readiness

ReliantEdge configures ERP systems around Nigerian business realities: VAT, WHT, PAYE, payroll statutory reports, audit trails, approval controls, and FIRS e-invoicing readiness. Our approach focuses on clean master data, correct tax treatment, reliable invoice structures, reconciliations, and management-ready

reporting.

- FIRS e-invoicing readiness: invoice data quality, tax fields, approval workflows, export/integration planning, and audit support.
- VAT and WHT: tax codes, posting rules, supplier/customer schedules, reconciliation extracts, and compliance dashboards.
- PAYE and payroll statutory reports: pay elements, deductions, employer contributions, payslips, and monthly schedules.
- Audit and control: role permissions, approval limits, segregation of duties, transaction logs, and exception reports.

Case Study Snapshots

Scenario	Transformation	Measured Outcome
Manufacturing Operations	Unified finance, inventory, and production visibility across multiple operational units.	40% efficiency gain 60% faster reporting stronger cost control
Trading & Distribution	Implemented multi-warehouse inventory and automated reordering with integrated financial reporting.	35% stock reduction 99.2% order accuracy 5 branches connected
Hospitality Payroll & Finance	Streamlined payroll, approvals, and finance reporting across a hospitality workforce.	500+ employees 100% compliance focus 80% payroll time saved
Professional Services	Connected projects, billing, finance, and Power BI reporting for leadership visibility.	50% faster billing real-time dashboards improved revenue tracking

Support SLA Model

Our support structure is designed to protect business continuity after go-live. Options include Essential Support, Priority Support, Managed ERP Services, and a Compliance Desk for statutory reporting, payroll, VAT, WHT, PAYE, and e-invoicing readiness support.
